Web Developer | AI Enthusiast

☎ +6285697153635 ✉ alwankapi@gmail.com

Profile

6th-semester Informatics student at Universitas Bina Sarana Informatika with an interest in Artificial Intelligence (AI), software development, and emerging technologies. Experienced in researching information, analyzing problems, and developing practical solutions. Passionate about learning new technologies and building functional, efficient, and user-friendly applications. Able to work independently or as part of a team and adapt quickly to new environments and challenges.

Education

2019 – 2022 | SMAS Terpadu Darul'Amal | Science

2022 – 2023 | PeTIK II Jombang | Digital Marketing

2023 – Present | Universitas Bina Sarana Informatika | Bachelor's Degree in Informatics

Project Experience

SIMKOS (Sistem Informasi Manajemen Kos)

University Project | 2026

Developed a web-based boarding house management system using CodeIgniter 4 to manage tenant, room, and payment data. Implemented user authentication, transaction records, analytics dashboard, and automated email notifications for payment status. Built using CodeIgniter 4, MySQL, and Tailwind CSS, with Git and GitHub for version control.
